RE: Pelican Point Map Update

DIV OF OIL GAS & MINING

Dear Mr. Jensen:

In a memo to you dated January 31, 2005 I stated that *our goal was to have a map to you by February 28, 2005 (unless an additional on-site survey was deemed necessary; in that case I would inform you accordingly)*. It has been necessary for us to have a new survey done of the area in order to provide more accurate mapping information to the Division. An update and brief description of our most recent work on the project follows.

- We contacted the surveyors that provided the original survey information for earlier maps (Dudley & Associates, Orem, Utah). We needed additional information to verify some of their survey points. I could not get them to respond to my telephone calls to answer my questions about their work.
- I then contacted SITLA for legal descriptions of the lease areas. Mr. John Blake informed me that there were some problems with the BLM surveys of the lease areas. Mr. Blake recommended that we contact BLM to see if these problems were solved by Dudley & Associates during their earlier surveys.
- I have hired a surveyor to re-survey the lease areas along with other areas (i.e. current mining activities, disturbance areas, and so on).

In other words, we are working on the project and have made some progress albeit slower than I would have liked. I appreciate your patience and please call me anytime with your questions or comments.

Sincerely,

Patrick D. Collins, Ph.D.
Environmental Consultant
